

Create a flask application

DATE:	22 October 2022
PROJECT NAME:	Project-Web Phishing Detection
Team ID	PNT2022TMID31831
MAXIMUM:	4 Marks

The screenshot displays an IDE window titled 'Containment Zone Alerting Application - app.py'. The left sidebar shows a project structure for 'flaskProject' with folders like 'static', 'templates', and 'venv'. The main editor shows the following Python code in 'app.py':

```
1 from flask import Flask
2
3 app = Flask(__name__)
4
5 @app.route('/')
6 def hello_world(): # put application's code here
7     return 'Project held to be Start Hurray!!'
8
9
10
11 if __name__ == '__main__':
12     app.run()
13
```

The bottom panel shows the command prompt output for running the application:

```
Run: flaskProject x
FLASK_APP = app.py
FLASK_ENV = development
FLASK_DEBUG = 0
In folder D:/flaskProject
D:\flaskProject\venv\Scripts\python.exe -m flask run
* Serving Flask app 'app.py'
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
